The Mathematical Intelligencer Index

Volume 14

Authors

Adler, Alan. Magic cubes and the 3-adic zeta function. (3) 14–23.

Akin, Ethan. The spiteful computer: A deterministic paradox. (2) 45–47.

Albree, Joe. Salem's Bowditch. (1) 58–60.

Alexander, C., Giblin, L., and Newton, D. Symmetry groups of fractals. (2) 32–38.

Anderson, Philip W. Review of *The new physics,* edited by Paul Davies. (1) 70–71.

Anglin, W. S. Mathematics and history. (4) 6–12.

Bier, Martin. A Transylvanian lineage. (2) 52–54.

Birkhoff, Garrett, and Mac Lane, Saunders. *A survey of modern algebra:* The fiftieth anniversary of its publication. (1) 26–31.

Bokut', L. A., Vershik, A. M., and Viro, O. Ya. To guard the future of Soviet mathematics. (1) 12–15.

Bölling, Reinhard. . . . Deine Sonia: A reading from a burned letter (translated by David E. Rowe). (3) 24–30.

Bos, Len. Review of *Curves and surfaces for computer aided geometric design,* by Gerald Farin. (3) 66–68.

Burton, David M. Review of *The mathematics of great amateurs (2nd edition),* by Julian Lowell Coolidge. (3) 68–69.

Chaitin, Gregory J. Review of *A diary on information theory,* by Alfréd Rényi. (4) 69–71.

Cox, Steven J. The shape of the ideal column. (1) 16–24.

Curtis, Charles W. Representation theory of finite groups: From Frobenius to Brauer. (4) 48–57.

Davis, Chandler. Which is to be master, that's all. (2) 51.

Dieudonné, J. Review of *Joseph Liouville 1809–1882, master of pure and applied mathematics,* by Jespe Lützen, (1) 71–73.

Dimitrić, Radoslav. Anatoly Ivanovich Maltsev. (2) 26–30.

Døsen, K. One more reference on self-reference. (4) 4–5.

Drucker, Thomas. *Review of Mathematical visions: The pursuit of geometry in Victorian England* by Joan Richards. (4) 77–79.

Edwards, Harold M. Mathematical ideas, ideals, and ideology. (2) 6–19.

Fauvel, John, and Shenitzer, Abe. Review of *Mathematics and its history,* by John Stillwell. (3) 69–73.

Fefferman, C. L., and Folland G. B. The final oral exam. 4 (31).

Folland, G. B., and Fefferman, C. L. See Fefferman, C. L., and Folland, G. B.

Folland, G. B., and Green, Mark L. The analyst. 4 (37).

Gaier, Dieter. Abraham Ezechiel Plessner (1900–1961): His work and his life. (3) 31–36.

Gale, David. Mathematical entertainments. (1) 54–57; (2) 68–71; (3) 60–65; (4) 58–62.

Giblin, L., Alexander, C., and Newton, D. See Alexander, C., Giblin, L., and Newton, D.

Glass, A. M. W. The ubiquity of free groups. (3) 54–57.

Green, Mark L., and Folland, G. B. See Folland, G. B. and Green, Mark L.

Hanlon, Phil. Order and disorder in algebraic combinatorics. (2) 20–25.

Hargittai, István. Quasicrystal sculpture in Bad Ragaz. (3) 58–59.

Hersh, Reuben. Review of *Sets, numbers and universes* and *Science, computers, and people. From the tree of mathematics,* by Stanislaw Ulam, and *Analogies between analogies. The mathematical reports of S. M. Ulam and his Los Angeles collaborators,* edited by Françoise Ulam and Al Bednarek. 4 (71–73).

Leslie, John. The doomsday argument. (2) 48–51.

Mac Lane, Saunders, and Birkhoff, Garrett. See Birkhoff, Garrett, and Mac Lane, Saunders.

Martzloff, Jean-Claude. Li Shanlan (1811–1882) and Chinese traditional mathematics. (4) 32–37.

Mathias, A. R. D. The ignorance of Bourbaki. (3) 4–13.

Matijasevich, Yuri. My collaboration with Julia Robinson. (4) 38–45.

McCleary, John. *Review of A history of non-Euclidean geometry,* by B. A. Rosenfeld. (3) 73–75.

Meyerhoff, Robert. Geometric invariants for 3-manifolds. (1) 37–53.

Moĭshezon, Boris. I. R. Shafarevich's essay "Russophobia." (1) 61–62.

Morgan, Frank. Minimal surfaces, crystals, shortest networks, and undergraduate research. (3) 37–44.

Novikov, S. P. Integrability in mathematics and theoretical physics: Solitons. (4) 13–21.

Parshall, Karen V. H. The 100th anniversary of mathematics at the University of Chicago. (2) 39–44.

Riskin, Adrian. The mathematician's vacation. (3) 13.

Roitman, Judith. The uses of set theory. (1) 63–69.

Russ, Steve. Bolzano's analytic programme. (3) 45–53.

Sallows, Lee C. F. New pathways in serial isogons. (2) 55–66.

Senechal, Marjorie. Review of *The emperor's new mind: Concerning computers, minds and the laws of physics,* by Roger Penrose. (2) 72–77.

Senechal, Marjorie. Review of *Visions of symmetry: Notebooks, periodic drawings, and related work of M. C. Escher,* by Doris Schattschneider. (2) 72–77.

Shenitzer, Abe, and Fauvel, John. See Fauvel, John, and Shenitzer, Abe.

Sierksma, Gerard. Johann Bernoulli (1667–1748): His ten turbulent years in Groningen. (4) 22–31.

Speiser, David. Review of *The Bernoulli edition: The collected scientific papers of the mathematicians and physicists of the Bernoulli family.* (4) 63–64.

Speiser, David. The Bernoullis in Basel. (4) 46–47.

Stanton, Nancy K. The Riemann mapping non-theorem. (1) 32–36.

Stewart, Ian. Review of *A budget of trisections,* by Underwood Dudley. (1) 73–77.

Struik, D. J. Review of *The crest of the peacock,* by George Ghevergheses Joseph. (4) 66–68.

Szekeres, George. Review of *Polynomials,* by E. J. Barbeau. (1) 78–79.

Vershik, A. M., Viro, O. Ya., and

Bokut', L. A. See Bokut', L. A., Vershik, A. M., and Viro, O. Ya.

Viro, O. Ya., Vershik, A. M., and Bokut', L. A. See Bokut', L. A., Vershik, A. M., and Viro, O. Ya.

Wheeler, David. *Review of Ethnomathematics: A multicultural view of mathematical ideas,* by Marcia Ascher. (4) 64–66.

Wilson, Robin. Stamp Corner. (1) 80; (2) 80; (3) 76; (4) 74.

Reviews

Ascher, Marcia. *Ethnomathematics: A multicultural view of mathematical ideas.* Reviewed by David Wheeler. (4) 64–66.

Bednarek, Al, and Ulam, Françoise, eds. *Analogies between analogies. The mathematical reports of S. M. Ulam and his Los Angeles collaborators.* Reviewed by Reuben Hersh. (4) 71–73.

Barbeau, E. J. *Polynomials.* Reviewed by George Szekeres. (1) 78–79.

Coolidge, Julian Lowell. *The mathematics of great amateurs (2nd edition).* Reviewed by David M. Burton. (3) 66–68.

Davies, Paul, ed. *The new physics.* Reviewed by Philip W. Anderson. (1) 70–71.

Dudley, Underwood. *A budget of trisections.* Reviewed by Ian Stewart. (1) 73–77.

Farin, Gerald. *Curves and surfaces for computer aided geometric design (2nd edition).* Reviewed by Len Bos. (3) 66–68.

Joseph, George Gheverghese. *The crest of the peacock.* Reviewed by D. J. Struik. (4) 66–68.

Lützen, Jesper. *Joseph Liouville 1809–1882, master of pure and applied mathematics.* Reviewed by J. Dieudonné. (1) 71–73.

Naturforschende Gesellschaft, ed. *The Bernoulli edition: The collected scientific papers of the mathematicians and physicists of the Bernoulli family.* Reviewed by David Speiser. (4) 63–64.

Penrose, Roger. *The emperor's new mind: Concerning computers, minds and the laws of physics.* Reviewed by Marjorie Senechal. (2) 72–77.

Rényi, Alfréd. *A diary on information theory.* Reviewed by Gregory J. Chaitin. (4) 69–71.

Richards, Joan. *Mathematical visions: The pursuit of geometry in Victorian England.* Reviewed by Thomas Drucker. (2) 77–79.

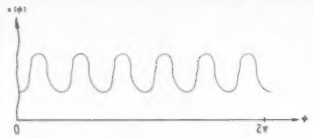
Rosenfeld, B. A. *A history of non-Euclidean geometry.* Reviewed by John McCleary. (3) 73–75.

Schattschneider, Doris. *Visions of symmetry: Notebooks, periodic drawings, and related work of M. C. Escher.* Reviewed by Majorie Senechal. (2) 72–77.

Stillwell, John. *Mathematics and its history.* Reviewed by John Fauvel and Abe Shenitzer. (3) 69–73.

Ulam, Stanislaw. *Sets, numbers and universes,* and *Science, computers and people. From the tree of mathematics.* Reviewed by Reuben Hersh. (4) 71–73.

LECTURE NOTES IN STATISTICS



P. BARONE and A. FRIGESSI, both of Instituto per le Applicazioni sel Calculo, Roma, Italy;
M. PICCIONI, Dipartimento di Matematica Pura de Applicata, Universita de l'Aquila, Italy

STOCHASTIC MODELS, STATISTICAL METHODS, AND ALGORITHMS IN IMAGE ANALYSIS

1992/APP. 258 PP./SOFTCOVER/$44.00(TENT.)
ISBN 0-387-97810-0
LECTURE NOTES IN STATISTICS, VOLUME 74

B.C. ARNOLD, University of California, Riverside, CA; E. CASTILLO and J.-M. SARABIA, both of University of Cantabria

CONDITIONALLY SPECIFIED DISTRIBUTIONS

1992/APP. 151 PP./SOFTCOVER/$30.00
ISBN 0-387-97794-5
LECTURE NOTES IN STATISTICS, VOLUME 73

J.K. LINDSEY, University of Liege, Belgium

THE ANALYSIS OF STOCHASTIC PROCESSES USING GLIM

1992/294 PP./SOFTCOVER/$44.00
ISBN 0-387-97761-9
LECTURE NOTES IN STATISTICS, VOLUME 72

E.M.R.A. ENGEL, University of Massachusetts, Amherst, MA

A ROAD TO RANDOMNESS IN PHYSICAL SYSTEMS

1992/155 PP., 32 ILLUS./SOFTCOVER/$30.00
ISBN 0-387-97740-6
LECTURE NOTES IN STATISTICS, VOLUME 71

Springer-Verlag
NEW YORK

K. IIDA, National Defense Academy, Yokosuka, Japan

STUDIES ON THE OPTIMAL SEARCH PLAN

1992/130 PP./SOFTCOVER/$25.00
ISBN 0-387-97739-2
LECTURE NOTES IN STATISTICS, VOLUME 70

N.J.D. NAGELKERKE, International Statistical Institute, Voorburg, The Netherlands

MAXIMUM LIKELIHOOD ESTIMATION OF FUNCTIONAL RELATIONSHIPS

1992/110 PP./SOFTCOVER/$25.00
ISBN 0-387-97721-X
LECTURE NOTES IN STATISTICS, VOLUME 69
